

Overnight Respite

Family members who care for a loved one with a developmental disability can sometimes need a break. ADAPT's Respite services provide temporary relief from the demands of care giving, which can help reduce overall family stress.

- We support individuals who are four years old and up residing in New York City and Westchester County.
- Our facility is the only freestanding wheelchair accessible overnight respite program in New York City, located on the grounds of ADAPT's spacious 12-acre Hausman Campus in the Pelham Gardens neighborhood of the Bronx.
- We offer a wide variety of recreational activities, can administer medication and all meals are provided.

The Overnight Respite Program is operational 24-hours a day, seven days a week. Guests may stay at the residence for up to fourteen days at a time, depending on availability, and a maximum of 84 days per year.
