Pyramid Model

The Pyramid Model is a conceptual framework of evidence-based practices for promoting young children's healthy social and emotional development.

Supporting the Pyramid Model

- At the base of the Pyramid Model is a skilled and effective workforce.
- The foundation for all practices within the Pyramid Model consists of the essential systems and policies that enable a workforce to adopt and maintain these evidence-based practices.

Tier 1: Universal Promotion

Universal supports for all children through nurturing and responsive relationships and high quality environments. At the universal level we include the practices needed to ensure the promotion of the social development of all children.

- High Quality Environments
 - Inclusive early care and education environments
 - Supportive home environments
- Nurturing and Responsive Relationships
 - Essential to healthy social development
 - Includes relationships with children, families and team members

Our program teaches the students about the 3B's. We incorporate this into all of our activities and learning throughout the day. We model for children what it means to be:

Be kind, Be safe, Be helpful
